21 DEGREES SCORPIO 56 MINUTES

HOW:

THE SIGN SCORPIO: *Scorpio is one of the most powerful signs in the Zodiac, because of its strong will and determination to accomplish whatever it attempts to do. Its analytical mind, strong intuition, reasoning power, perception, long range planning ability, magnetism, and energy are assurances of success. Where you have this sign in your chart is where you want to merge with others. This sign has the power to control, and has a need to delve deeply. It cannot be fooled. Eruption of repressed emotions causes healing and cleansing. Scorpio rules credit cards and borrowed money. This month will emphasize our finances. Are we in control of our money, or does it control us? Are we a slave to our bills? Release and letting go is one of the major lessons of Scorpio. Resentments that hang on, a fear of letting go of the past, and the excessive drive to control, can easily lead to blockages in the body's elimination process.*

THE SABIAN SYMBOL: HUNTERS STARTING OUT FOR DUCKS.

This is a symbol of the simplicity of self-expression and the straightforward honesty of desire which men tend to exhibit from birth in nearly every realm of normal or everyday activity, and of the average individual's need for genuine psychological elbowroom in his dealing with the world around him. Here is freedom of action willy-nilly, as marked in the frequent determination of the human spirit to have this by one means if not by another. The keyword is ENTERPRISE. When positive, the degree is a complete lack of personal frustration and a constant refinement of special and practical skills in the approach to daily problems, and when negative, a callous exploitation of all life. THE DECANATE: CANCER

The subconscious, the emotions, and instinctual behavior. Intense emotion and great sensitivity. This sign connects us with the past, our roots, family, and the way we were raised. This is the most fertile sign of the zodiac. Time to nurture, protect, and care for the things that we want to bring forth now. It rules the breast and the stomach. The house ruled by Cancer shows where, moved by emotion, you seek out experiences, which secures your Aries identity and builds foundations in your personal life. You protect this area of your life like a mother protecting her young. You function in this area with "gut feeling".

THE DWAD: CANCER

RULERS: MARS\PLUTO\MOON:

Pluto is in Capricorn breaking down and restructuring the system we live by. Mars is in Sagittarius stimulating the adventure in all of us to explore new horizons. Where Scorpio is in your chart will receive powerful energy for growth coming from this North Nodal Solar Eclipse. Saturn is also in Scorpio and will be for a couple of years. The emphasis is on power and control. We need to be in control of the Scorpio house in our chart rather than it controlling us. You can transform and regenerate things in your life now. You can recycle what you no longer need. You can get rid of garbage and the things that are in the way. Out of the garbage breathes new energy for you. It is time to stir up that compost pile and see what surfaces. It will be the energy that turns your life into the direction you want. A Solar Eclipse is a New Moon with a lot more power. Its effects last for a couple of years. The things you focus on now will grow. You need to be in the zone. You need to be like a laser beam. You need to have no doubt. If you can do this you will rise in ways you never expected. Get rid of a negative attitude. You do not want to dilute this energy being all over the place. Mercury is retrograde in Sagittarius. Reworking how you communicate is part of the picture.
