

THE NEW MOON LAW OF ABUNDANCE

02 DEGREES CAPRICORN 35 MINUTES

HOW:

THE SIGN CAPRICORN:

The sign of social responsibility. Build your foundations in the outside world. What mark will you make? What will you contribute? Capricorn describes the need to define your social territory, to find security within your social level. Its house describes where you are territory-conscious, where you need to feel secure. Here, you need respect, recognition, and approval from the outside world. The responsibilities and limitations encountered in this area of your life involve finding a responsible social place and establishing security within it. The challenge for this house in your chart is perseverance and hard work. While things may not come easily here, efforts will be rewarded, if your energies are channeled constructively. Patience is necessary, if one path is blocked, find another.

THE SABIAN SYMBOL: THE HUMAN SOUL RECEPTIVE TO GROWTH AND UNDERSTANDING.

This is a symbol of mankind's fundamentally naïve capacity for experience, and of every individual's equally fundamental dependence on the understanding and support of fellow participants in each moment of self-discovery. Here is a delight in normal living, not through its limitation but rather through a reiterated release of selfhood. Life is found to be real and rewarding because it may be encountered in such infinite ramifications of itself. The keyword is AVIDITY. When positive, the degree is a gift for entering into the kaleidoscopic patterns of personal relationship with an unbounded enthusiasm, and when negative, simple shiftlessness or abandon. "Sabian Symbols" Marc Edmund Jones.

THE DECANATE: CAPRICORN

THE DWAD: AQUARIUS

This is a fixed air sign. This is the sign of the rebel, or the individualist. They approach life through their intellect. Old molds, old concepts, those things which have outgrown their usefulness in every area of life are being shattered. New ideas, brilliance, new inventions show us a new way now. Aquarius is the sign of spiritual rebirth. Public affairs become more important at this time, as there is an interest in the welfare of others in a social sense.

RULERS:

SATURN/URANUS:

Pluto went into Capricorn on November 26th, 2008. It has now been there over two years, and has 14 more years to go. This sign is undergoing intense purification and change. It is a long process. This New Moon, at two and a half degrees of Capricorn is close to Pluto at 7 degrees Capricorn. This puts us into a situation during the next 30 days that requires complete focus. There is no wiggle room. Saturn, the ruler of Capricorn, is currently in Libra and the focus is on relationships. The sign Libra is also about fairness and balance. The system is undergoing a change that will make it just, fair, and balanced. The leadership will have to exhibit those qualities.

Uranus is just getting moving in the sign Aries. It has been dancing around the cusp for the last 18 months. It has been loosening our grip with the past; so, we can move forward in a new way. Uranus is at 00 degrees Aries 44 minutes. This is a square to this lunation at 2 degrees Capricorn. A square is a challenge that requires action, and in Cardinal signs, movement is definitely required. Change is in the air with practical results. Work will be required, and attention to detail, with Mars in Virgo.

Jupiter is nicely positioned in Taurus giving favorable energy to the New Moon in Capricorn. New beginnings! Capricorn, Taurus, and Virgo are earth signs. This brings practical and tangible results to what we attempt now. Sun, Moon, and Pluto in Capricorn, Jupiter is in Taurus, and Mars is in Virgo, which puts substance into our lives. This is not a time to do things that are not based in reality. The energy is all about tradition and enduring values.
